Summary

Dorothy's care costs have more than doubled what was budgeted for this quarter, reaching \$12,135 instead of the expected \$6,681, which means you'll need to have an urgent conversation with BlueBerry Care about what's driving these extra expenses. She's receiving a solid level of support with 122 services this quarter and there are no active concerns flagged, which is reassuring. The flagged anomalies are marked as low priority, so nothing alarming there, and it's wonderful that she hasn't needed hospital care over the past year. What really needs your attention right now is understanding why costs have jumped so dramatically so you can plan your budget accordingly and make sure this spending pattern is both necessary and sustainable going forward.
