**Summary**

Dorothy's care costs have significantly exceeded the budgeted amount this quarter, with spending reaching 182 percent of the planned allocation. The 122 services she received suggest her support needs have grown, and it's worth having a conversation with BlueBerry Care about whether her care plan still matches what she actually requires. The good news is there are no open concerns flagged and she hasn't needed hospitalisation in the past year, which shows her care is working well overall. However, you'll want to review the budget situation soon to understand if these higher costs are temporary or likely to continue, so you can plan ahead with confidence.
