---	--	--	----------------------------------

Summary

Dorothy's care costs have significantly exceeded her budget this quarter, with spending reaching 182% of the approved amount, which means you're now responsible for covering an extra \$5,453.40 out of pocket. The good news is that she's receiving comprehensive support with 122 services delivered and no hospital visits in the past year, suggesting her care is working well to keep her healthy and at home. However, the system has flagged 50 low-priority concerns that BlueBerry Care should address, and the main issue you need to tackle urgently is understanding why costs have blown out so substantially and whether her care plan needs adjusting to bring spending back in line with her budget. It's worth having a direct conversation with BlueBerry Care about whether these overages are temporary, what's driving them, and whether there are more cost-effective ways to deliver the same quality support Dorothy needs.
