---	--	--	----------------------------------

Summary

Dorothy's care costs have more than doubled what was budgeted for this quarter, which means BlueBerry Care has provided significantly more support than planned. With 122 services delivered, it appears Dorothy needed extra help beyond what was originally anticipated, though the good news is she hasn't needed hospital care in the past year, which suggests the increased support may be working well. The main thing to check with BlueBerry Care is whether this higher spending level is expected to continue, because if it does, her care plan and budget will need adjusting to match her actual needs. The 50 low-level flags raised aren't concerning in themselves, but it's worth reviewing them with her provider to understand what's driven the extra costs and make sure everything aligns with her goals for staying at home.
